

Job Portal + Assessment Tests + HR management

REKRU

ABOUT US

RekruJobs.com is an Indian company that helps companies in Human Resource Management. It was founded in the year 2017 by Harvard and IIM Alumni's. Some of the Fortune 500 companies hire their employees through the assessment test, Job Portal, and Human Resource Management software.

Rekru is a multi-dimensional platform with the dynamic and personalized content providing accurate assessment for employability in various industry sectors and job profiles. It is a computer adaptive test, to judge one's capability. Also, help job seekers to find job and employer to recruit the best talent through a Job portal. It also helps employers to manage their company through HR management software.

**WHAT
WE DO**

JOB PORTAL FEATURES

Extensive Network

Rekru is connected to 3000+ companies at the global level and this network is increasing in every 30 minutes.

For Everyone

Rekru provides job opportunities to everyone – be it a fresher or a professional with years of experience, Rekru has jobs for everyone.

Freelancer Special

A number of other job portals offer only internships for freelancers, while Rekru lists top grade job options with a section specially dedicated to freelancers.

JOB PORTAL FEATURES

Job Categorisation

Rekru covers almost all job categories from junior to senior level positions. You can browse and choose the one suiting your skills and interest the best.

The job categorization is extensive yet simple.

Unlike many other job platforms, Rekru offers candidates an opportunity to communicate directly with the recruiter, once the recruiter shows interest in the candidate's profiles.

Jobs Matching your Profile

Matching the skills and experience of the candidate, Rekru selects and shows the vacancies with the same requirements. This saves on the candidate's time and helps him/her choose the best.

Direct Contact with Recruiters

Unlike many other job platforms, Rekru offers candidates an opportunity to communicate directly with the recruiter, once the recruiter shows interest in the candidate's profiles.

HR MANAGEMENT SOFTWARE

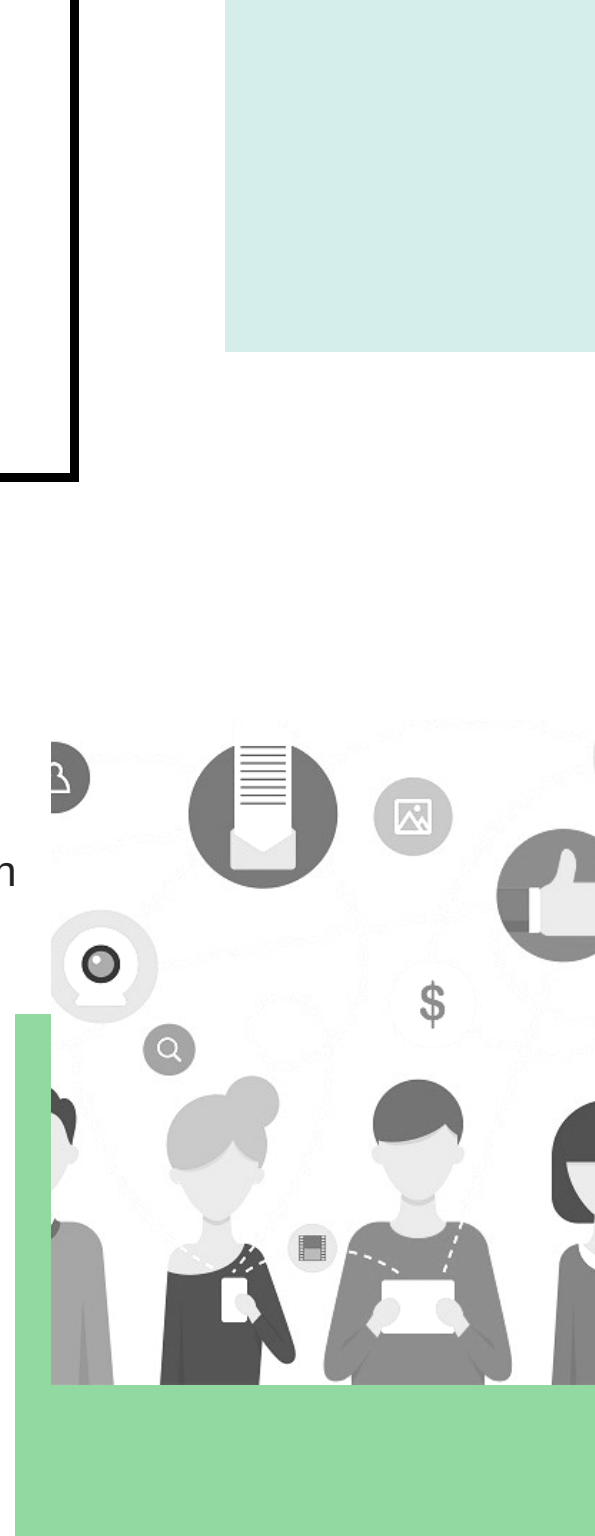

Personnel Information Management (PIM)

Simplify and streamline your HR data with Rekrü HRM's Personal Information Management (PIM) module, helping you centralize all your employee data, no matter where you're located in the world. No need to trawl through spreadsheets, or piles of paperwork, you can enjoy fast and efficient access at your fingertips, through selection and filter criteria you can customize depending on your organization.

Time & Attendance Management

The ability to manage leave and create multiple leave types depending on company or state policies is essential, especially if your organization is located across a number of countries.

With our Global Leave Management System, you can create multiple leave types such as Vacation, Sick, FMLA, Maternity, Family Care Leave, Child Care Leave quickly and easily.

HR MANAGEMENT SOFTWARE

Recruitment

Module features configurable workflows to suit your company, department or specific vacancies. Reach 1000's of job boards around the world for sourcing and build a rich database of prime candidates.

The built-in interview assistant will allow you to conduct structured interviews and using cognitive computing from IBM Watson our decision support system will provide you with personality insights and predictive analytics to hire the right candidate.

Performance

The Rekrü HRM Performance module gives you the ability to create custom performance evaluations and self-scaling employee assessments that key into company performance indicators and job expectations. Managers and employees look to HR for well-structured performance reviews.
